

Durasein

Design that holds
up to play

The Project

Suzdal Water Park Vladimir Oblast, Russia Completed 2025

- Hospitality Sector
- Application: reception area, canteen counter, freeform benches, countertops, and wall cladding
- Material: DM1005 Glacier White, DM6012 Amped, DM6001 Vitality Red

The Challenge

The designers of this new water park wanted a dazzling look that would scream “fun” from the moment guests step into the building. Their goal was to find a material that could deliver vibrant colors and fun, creative shapes, but given the nature of a water park, it also had to stand up to guests in bathing suits and wet towels. Easy cleaning was a must, along with food-safe materials for the soda bar and canteen.

The Result

Their bold vision came to life with the help of Durasein. The reception area provides an instant “wow” factor, with sweeping curves, integrated lighting, and a brilliant Vitality Red color inviting everyone in to play. The same color was used for the curved soda bar, while the equally brilliant Amped defines the counters and walls of the canteen area. Glacier White was chosen for the clean, bright countertops and rounded, organic shapes of the 3D benches, creating an inviting and playful place to gather and have fun.

Materials

Durasein Solid Surface delivered the exact combination of characteristics the designers had in mind. Not only did it come in brilliant colors with a visual punch -- it also lent itself to all the 2D and 3D forms the designers envisioned. Flat sheets were used to make the seamless, water-resistant countertops and wall coverings, and thermoforming was used to create the wild curves of the reception area and benches.

Durasein in Hospitality

Gorgeous looks and a performance that's tough as nails -- that's Durasein Solid Surface. Our material resists scratches, dents, moisture, mildew, and microbes. It's even easy to clean and can be resurfaced in place to keep your design looking fresh and beautiful for every customer, day in and day out.

Discover all the advantages that the Durasein Solid Surface can bring to your next design by visiting and visit us online.
