

Durasein® Declare® Certification

Our material just got more transparent.

By qualifying for the Declare® label, Durasein® Solid Surface has made it easier than ever to see everything in our material, giving designers, property owners, and end users a clear and complete understanding of our health and safety data.

What is Declare®?

Launched by The International Living Future Institute in 2012, Declare® is a free online database to help specifiers share and find healthy building products. This industry-recognized tool shares complex data, including material inventory and health information, in an easy-to-understand ingredient label for each product.

What can the Declare® label tell me?

Every Declare® label provides a detailed description of the following:

- Where the product was assembled.
- The material's life expectancy and end-of-life options.
- The name, CAS number, and percentage of all intentionally added product ingredients, color-coded to flag any chemicals of concern.
- Volatile organic compound (VOC) and carbon content.
- Compliance with the Living Building Challenge® (LBC) Red List of worst in class materials, chemicals, and elements known to pose serious risks to human health and the greater ecosystem.

Why is this helpful?

The Declare® platform:

- Allows designers to find products for buildings that support human and environmental health.
- Makes the specification process fast, thorough, and efficient.
- Verifies which products meet leading green building standards, including the Core Green Building, LBC, LEED, and WELL Certifications.
- Provides a trusted, third-party report to reassure customers.
