

Durasein

A Space That Knows Your Name

The Project

Dedo's Deli
Auburn Hills, Michigan
Completed 2026

- Material: DM5044 Sun Kissed
- Architect and Design : Mercury Project Design

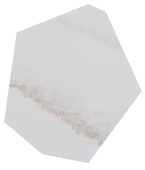

The Challenge

Dedo's Deli is a new neighborhood sandwich shop rooted in old-time traditions. Inspired by her father's 30-year career in the deli business, the owner dreamed of creating the kind of place where everyone could feel like a regular. She envisioned a warm, inviting space that would surround customers with a sense of connection and family values.

But that cozy feeling and traditional deli style weren't the only things on her order. Anticipating a steady flow of customers, she also needed surfaces that could handle a non-stop stream of soups, sandwiches, and even coffee spills, without losing their bright, inviting appeal.

Materials

Mercury Project Design chose Durasein Solid Surface for the counters and table tops in Dedo's Deli, specifying the creamy, bronze-veined Sun Kissed color to evoke old-time marble deli counters. Made of high-performance acrylic, Durasein is food-safe, non-porous, and resists dents, stains, scratches, microbes, and mildew. It can even be renewed and repaired in place, helping Dedo's create a welcoming environment for every guest, year after year.

The Result

Opened in 2026, Dedo's successfully captures the spirit of delis from days gone by. A painting of the owner's father sets a welcoming, family-oriented tone, while tufted booths, bentwood chairs, and a traditional curved glass deli case harken back to older times. The creamy white tables and expansive windows keep the restaurant bright and welcoming, and soft green accent walls and pendulum lights add to its charm.

Durasein in Hospitality

Durasein Solid Surface can achieve any look you want to set your business apart, from natural, stone-like surfaces to neutrals to bold accents. Its hard-wearing performance stands up to high-touch, high-traffic areas, and the seamless, non-porous, and non-toxic surface is ideal for serving food and drink. It's even easy to wipe down and sanitize, streamlining cleaning procedures to keep traffic moving efficiently.
